JITESH SHARMA

MERN Stack Developer | Full Stack Developer | Software Developer

Jaipur, Rajasthan | +91 9929878107 | jitesh04sharma@gmail.com | linkedin.com/in/jitesh-sharma-772888437 | github.com/Jitesh0404

PROFESSIONAL SUMMARY

MERN Stack Developer with 3+ years of experience designing, building, and scaling high-performance web and mobile applications using MongoDB, Express.js, React.js, and Node.js (MERN Stack), along with microservices architecture and AWS. Proven record of improving system reliability and performance by 30-40% through full-stack development, backend optimization, real-time systems (Socket.IO, GraphQL), and AI-driven automation, including end-to-end multi-tenant SaaS platforms built with React.js, Node.js, and TypeScript. Seeking a MERN Stack / Full Stack Developer role to build scalable, user-focused solutions.

TECHNICAL SKILLS

MERN Stack: MongoDB, Express.js, React.js, Node.js, Redux, RESTful API Development, Full Stack Development
Front-End: JavaScript (ES6+), TypeScript, React.js, React Native, HTML5/CSS3, Tailwind CSS, GraphQL, Socket.IO
Back-End & DB: Node.js, Express.js, NestJS, MongoDB, Mongoose, MySQL, PostgreSQL, pgvector, Redis, RESTful APIs, Microservices, BullMQ
Cloud & Tools: AWS, Git/GitHub/GitLab, Postman, VS Code, Vercel, Heroku
AI & Integrations: OpenAI API (Realtime, Embeddings), Anthropic Claude API, RAG, Twilio, Agora SDK, Razorpay, Stripe, CleverTap, Webhooks
Auth & Security: JWT, Passport.js, OAuth/SSO, MFA (TOTP), RBAC, Multi-Tenant Architecture

WORK EXPERIENCE

JPLoft — *Jaipur, Rajasthan (Remote)*

Software Developer — Full Stack (MERN) — *June 2026 - Present*

- Developed full-stack features end-to-end using Node.js, Express.js, and MongoDB, deploying a scalable microservices architecture that improved system reliability by 35%.
- Built an AI-powered chatbot automating customer interactions, reducing operational workload by 30%.
- Built an internal queue management and cron monitoring service, boosting task throughput by 40%.
- Developed an in-house real-time chat system with GraphQL and Redis Pub/Sub, cutting operational costs by 60%.
- Unified communication workflows (calls, SMS, VoIP) across Twilio, Exotel, and Tata Tele; optimized queries and server configs for 30% faster API response times.
- Managed AWS infrastructure, reducing cloud costs by 30% while maintaining scalability and uptime.

Gurucool

React Native Developer & MERN Stack Developer — *Jan 2024 - Present*

- Built cross-platform mobile apps using React Native and MVVM; improved responsiveness by 20% via Kotlin Coroutines and FlashList optimization.
- Implemented secure payments (Razorpay) and real-time video/audio (Agora SDK), increasing user retention by 15%.
- Reduced app crashes by 40% through profiling with Android Profiler and ADB; designed chat history and earnings-tracking modules and integrated CleverTap notifications, contributing to a 30% rise in user retention.

PROJECTS

JPLoft AI Calling Platform — Full Stack Enterprise SaaS (MERN-aligned + NestJS)

- Built a full-stack, multi-tenant SaaS platform end-to-end — React.js/TypeScript front-end and Node.js/NestJS back-end with PostgreSQL/pgvector — powering AI voice agents that handle inbound/outbound calls via the OpenAI Realtime API and Twilio.
- Implemented a RAG knowledge base, embedding documents for context-aware AI responses injected into live call sessions.
- Architected multi-tenant data isolation (AsyncLocalStorage tenant context) with JWT auth, MFA, SSO, and role-based access control.
- Built the React.js + TypeScript admin dashboard with a live call floor powered by Socket.IO, real-time transcripts, campaign dialing (BullMQ/Redis), and Stripe/Razorpay billing.

JPLoft AI Chat Agent — Full Stack Multi-Tenant SaaS (MERN-aligned)

- Built a full-stack, multi-tenant AI sales chatbot SaaS end-to-end — React.js/Vite front-end and Node.js/Express.js back-end with PostgreSQL — spanning company admin, super-admin RBAC console, and an embeddable website widget.
- Implemented a RAG knowledge pipeline using Qdrant vector search and Gemini embeddings for company-specific, context-aware sales and support responses.
- Developed a Leads CRM with automatic capture, status tracking, and Google Calendar meeting scheduling, plus real-time admin alerts via Firebase Cloud Messaging and WebSockets.
- Integrated multi-provider AI chat (Google Gemini, Anthropic Claude) with live voice-to-voice and ElevenLabs TTS, and built a WebSocket-based operator take-over system for live human handoff.

Tiffin Seva — React Native Multi-Role Marketplace App — *Play Store*

- Built a multi-role (customer, vendor, admin) React Native mobile marketplace app for meal subscriptions, using Redux Toolkit, React Navigation, and a JWT-secured REST API via Axios.
- Implemented Firebase Phone OTP and Google Sign-In authentication with JWT-based session management and role-driven navigation across customer, vendor, and admin experiences.
- Integrated Razorpay payments, real-time push notifications (Firebase Cloud Messaging + Notifee), and Google Maps/Places APIs for location-based vendor discovery.
- Built vendor and admin modules for menu/plan management, subscription and earnings tracking, coupons, and broadcast notifications.

Astrology Consultation App — React Native (Live Video & Chat) — *Play Store*

- Designed a chat history module and built a real-time video/chat consultation system using Agora SDK, plus a messaging layer with GraphQL and Tencent Cloud Chat SDK achieving a 95% chat success rate.
- Built personalized remedies, consultation-history, and an astrologer earnings-overview system with transaction analytics, improving client satisfaction by 30%.
- Optimized rendering with FlashList (25% faster responsiveness), integrated CleverTap notifications (20% engagement lift), and bridged JavaScript with native Android code for seamless cross-platform performance.

EDUCATION

Bachelor of Computer Applications (BCA) — *SRN Adarsh College* | *CGPA: 8.8*
